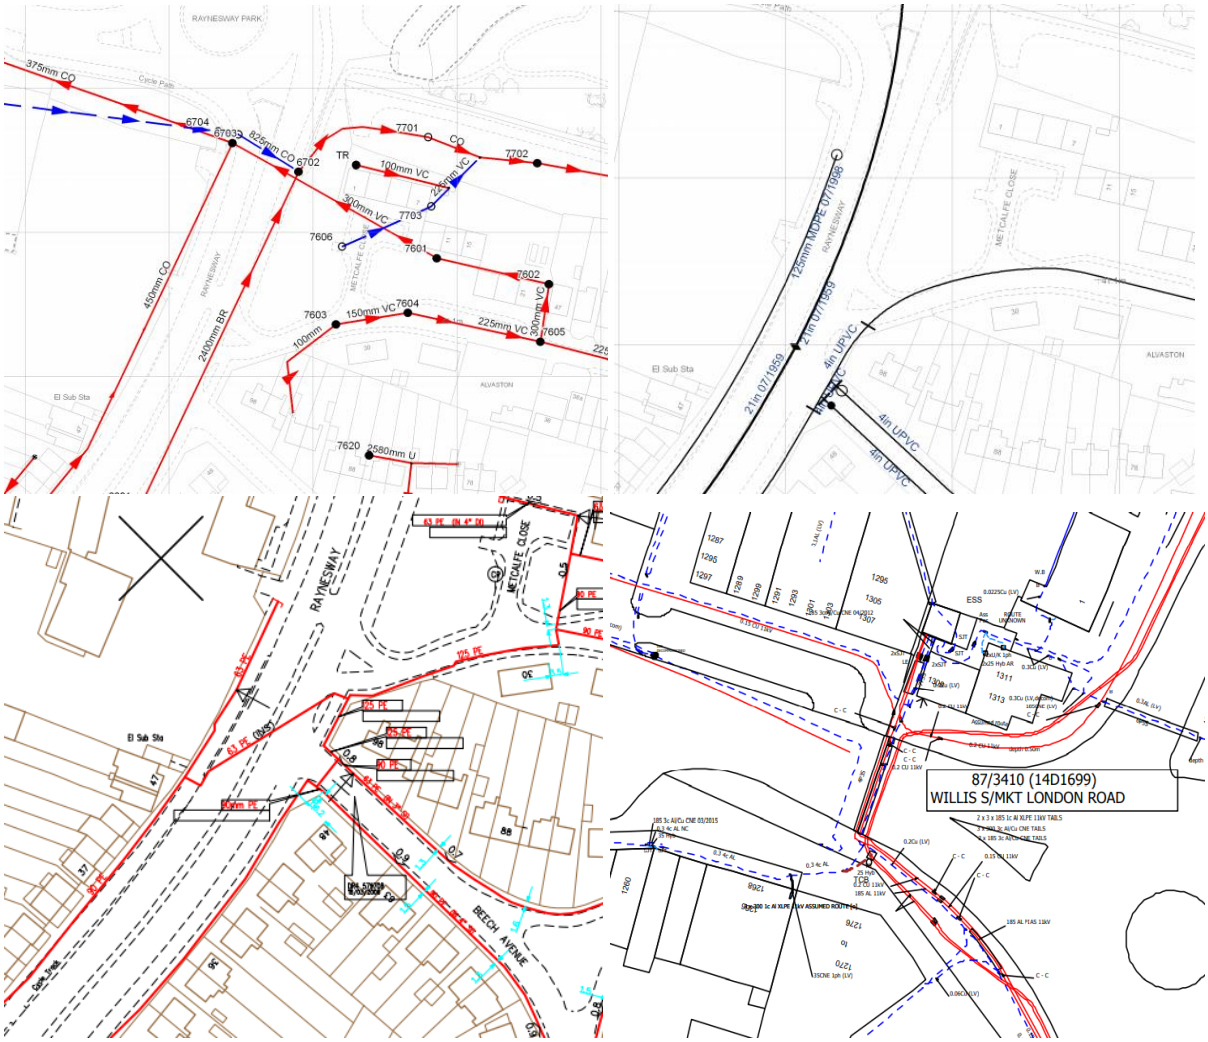
John Robinson Associates

Utility Survey Specialists & Consultants


Desktop Utility Record Searches (PAS 128 Survey Type D); Undertaking a thorough search and review of statutory utility record data in mandatory for a PAS128 survey and considered best practice on all projects. This is compliant with HSG47 and regarded as essential for any excavation works. We will undertake a search of utility company record data to obtain details of underground utilities, which may be present, collate the data, provide in PDF format and/or CAD. We can further consult as to the best way to detect and/or verify where the actual utility positions are on site and the most cost-effective methods.
